I. EMPLOYMENT, REPORTING UNITS AND AVERAGE WAGE IN UTAH BY FIRM SIZE 3

II. EMPLOYMENT, WAGES AND REPORTING UNITS BY FIRM SIZE AND INDUSTRY, IN UTAH, FIRST QUARTER 1984 5

Table

1. First Quarter Reporting Units and March Employment by Firm Size, 1970, 1980, 1981, 1982, 1983, & 1984 7

2. Utah Reporting Units, Employment and Wages by Firm Size and Industry, First Quarter 1984 8

III. EMPLOYMENT AND REPORTING UNITS BY FIRM SIZE, PLANNING DISTRICT AND COUNTY IN UTAH, FIRST QUARTER 1984 29

3. Utah Nonagricultural Reporting Units and Payroll Employment by Firm Size, Planning District and County, First Quarter 1984 31

INTRODUCTION

The data presented in this publication results from a categorization of firms in Utah according to the number of employees working for them during March of a specified year. By grouping firms with a similar number of employees together, it is easier to analyze the counties and industries containing Utah's smallest and largest employers. It is also possible to determine growth trends by size group; which group is providing the most employment, and which is paying the highest or lowest wages within an industry.

The number of reporting units in Utah differs somewhat from the actual number of firms. The term "reporting unit" is used to identify any firm, organization, division, or establishment for which data are separately maintained by the Utah Department of Employment Security.

Effective with first quarter 1980, employment and wage data were being maintained separately for each industrial activity and each worksite location in the state, with some notable exceptions. These are primarily construction and mining where mobility of employment prohibits establishing a permanent worksite, and in such cases county level data are maintained. In each case of a multiple worksite employer, data are maintained for each worksite location. In Utah, roughly 1,200 firms are multiple worksite employers responsible for approximately 7,600 worksite units. As a result of this worksite concept, the reporting unit count used in this publication is larger than the actual number of firms or employers.

SECTION I

EMPLOYMENT, REPORTING UNITS AND AVERAGE WAGE IN UTAH, BY FIRM SIZE

Firm size statistics are summarized into nine size categories. These categories, based on employment levels, are 0-3, 4-9, 10-19, 20-49, 50-99, 100-249, 250-499, 500-999, and 1,000 and over. In Utah, each increase to a higher size category results in a decrease in the number of firms. This inverse relationship exists because Utah's employer makeup is one of many smaller size firms and relatively few larger ones. In fact, over half of Utah's employers employ fewer than four workers and 99 percent employ fewer than 250.

The employment distribution among these nine categories is considerably different than the firm distribution. For instance, over half of the number of firms are in the 0-3 category, but only 5.9 percent of the nonagricultural employment is included there. Actually, the highest employment concentrations cluster around the middle ranges and in the largest (1,000 and over) category. The three middle categories (20-249 workers) contain over 45 percent of the nonagricultural employment.

For the most part, total wages within each size category show a pattern similar to employment with one notable exception. The 1,000 and over size category contains the highest amount of wages with 20.8 percent of the total. The next highest categories, like employment, cluster in the three middle ranges.

Average monthly wages show a relatively strong correlation to the nine categories. Except for the first and eighth size groups, with each step in the nine size categories the level of average monthly wages increases. This correlation of average monthly wage to size class at the total level does not, however, hold true for all industries. For instance, Finance, Insurance and Real Estate posts its highest average wage levels in the middle categories. Services shows a mixed pattern with higher average wage levels in the first two size groups and lower wage levels in the last three groups. Trade and Government are also mixed with little correlation to size group.

SECTION II

EMPLOYMENT, WAGES AND REPORTING UNITS BY FIRM SIZE AND INDUSTRY IN UTAH FIRST QUARTER 1984

TABLE 1

FIRST QUARTER REPORTING UNITS AND MARCH EMPLOYMENT

*Prior to 1980, employment and wage data for each firm were separately maintained for each county and/or industry of operation. Effective with 1980, data for each firm are maintained at the individual worksite level. As a result, the 1980 Reporting count is inflated relative to earlier years and growth comparisons would therefore not be valid. Also, a number of firms previously categorized in the larger size categories, are now broken down by worksite and fall accordingly into smaller size groups.
